

Muhammad Najmu Al Syathir Bin Azemi

Full-Stack Engineer

Kuala Lumpur, Malaysia · +60 13-735 3215 · alsyathir@gmail.com · najmusyathir.dev · github.com/najmusyathir

SUMMARY

Full-stack engineer with 2+ years of professional experience across front-end and back-end development, plus a growing personal infrastructure of self-hosted projects — browser-based terminals, uptime monitoring, multi-tenant SaaS, and async AI orchestration, all running on infrastructure I manage myself. Comfortable owning the full stack: front-end (React, Vue.js, Next.js), back-end (Node.js, Python, PHP), and infrastructure (Linux, Docker, Cloudflare). Currently a Full-Stack Engineer at myFirst Tech Sdn Bhd.

EXPERIENCE

Full-Stack Engineer

myFirst Tech Sdn Bhd

Mar 2025 – Present

- Maintain and support the company's internal-use web portal, keeping existing systems reliable in production — Next.js and TypeScript on the front end, Go services on the back end.
- Designed and developed the base architecture for Portal 3.0 — the next-generation rebuild of the internal portal.
- Helped design the customer journey for the company's subscription platform, integrating Stripe and Airwallex for transactions and cross-border payments via webhook-driven event flows.
- Built a real-time, AI-integrated customer-support chat, backed by Firestore, Firebase Realtime Database, and PostgreSQL.

Next.js · TypeScript · Go · Stripe · Airwallex · Webhooks · Firestore · RTDB · PostgreSQL

Junior Software Developer & Operations (FE)

Guard Genius Sdn Bhd

Aug 2024 – Mar 2025

- Developed and optimised responsive web applications with Vue.js and Tailwind CSS, ensuring cross-device compatibility.
- Integrated RESTful APIs with cross-functional teams to improve data flow and performance.
- Maintained code quality through Git branching strategies (staging/development).
- Redesigned the company website in Figma, improving UX and aligning with business goals.
- Used Sentry for bug tracking and resolution; implemented email automation via a mail server API.

Vue.js · Flask · MySQL · Git · Figma

Software Developer Intern

AQ Wise Sdn Bhd

Mar 2024 – Jun 2024

- Built an e-commerce platform in Laravel with product management and shopping-cart features.
- Designed and managed MySQL databases for catalogs, user profiles and order histories.
- Contributed a responsive sidebar to a Flutter project; built dynamic interfaces with Blade.

Flutter · Laravel · PHP · Tailwind CSS

PROJECTS
