

Muhammad Najmu Al Syathir Bin Azemi

Full-Stack Developer

Johor Bahru, Malaysia · +60 13-735 3215 · alsyathir@gmail.com · najmusyathir.dev · github.com/najmusyathir

SUMMARY

Full-stack developer with 2+ years of professional experience across front-end and back-end development, plus a growing personal infrastructure of self-hosted projects — browser-based terminals, uptime monitoring, multi-tenant SaaS, and async AI orchestration, all running on infrastructure I manage myself. Comfortable owning the full stack: front-end (React, Vue.js, Next.js), back-end (Node.js, Python, PHP), and infrastructure (Linux, Docker, Cloudflare). Currently a Full-Stack Developer at myFirst Tech Sdn Bhd.

EXPERIENCE

Full-Stack Developer Mar 2025 – Present
myFirst Tech Sdn Bhd

- Maintain and support the company's internal web portal, keeping production systems reliable.
- Designed and built the base architecture for Portal 3.0, the next-generation portal rebuild.
- Designed the customer journey for the company's subscription platform — mapping the end-to-end flow, not just implementing it.
- Designed and delivered the integration workflows for third-party systems — Singpass for national digital identity, and Airwallex and Stripe for payments, over webhook-driven event flows.
- Built a real-time, AI-integrated customer-support chat.
- Work AI-assisted day to day — Cursor and Anthropic's Claude in the editor, plus CLI-driven agents to automate routine tasks where the task suits it.

Next.js · TypeScript · Go · Singpass · Stripe · Airwallex · Webhooks · Firestore · RTDB · PostgreSQL

Junior Software Developer & Operations (FE) Aug 2024 – Mar 2025
Guard Genius Sdn Bhd

- Built and optimised responsive web applications, verified across devices.
- Integrated REST APIs with cross-functional teams to improve data flow and performance.
- Kept code quality with a staging/development Git branching strategy.
- Redesigned the company website in Figma, improving UX against business goals.
- Ran bug tracking and resolution in Sentry; automated email through a mail-server API.

Vue.js · Tailwind CSS · Flask · MySQL · Git · Figma · Sentry

Software Developer Intern Mar 2024 – Jun 2024
AQ Wise Sdn Bhd

- Built an e-commerce platform with product management and shopping-cart features.
- Designed and managed the MySQL schema for catalogs, user profiles and order history.
- Shipped a responsive sidebar into a Flutter project; built dynamic interfaces in Blade.

Flutter · Laravel · PHP · MySQL · Tailwind CSS

RECOGNITION

Industry Jury (Juri Industri) — FYP Exhibition C²PI 2026 6–7 Aug 2026
Faculty of Computer and Mathematical Sciences, UiTM Melaka (Kampus Jasin)

Anugerah Panel Industri — Best Industrial Panel Final Year Project Feb 2024
Kolej Pengkomputeran, Informatik dan Matematik, UiTM Melaka (Kampus Jasin)

PROJECTS

PERSONAL / SELF-HOSTED

personal-dashboard

AI-connected personal life assistant — finance, scheduling, meetings, career, tasks.

Next.js · TypeScript · Prisma · PostgreSQL

acadeon-cli

Browser-based PTY terminal with TOTP auth.

Next.js · TypeScript · node-pty

acadeon-pulse

Uptime monitor PWA with escalating push alerts.

Next.js · TypeScript · PWA

ai_hub_bridge

Async AI job queue bridging the Claude CLI to web and Telegram.

Next.js · TypeScript · Supabase Realtime

CPU-Motherboard Compatibility Checker

Final Year Project (UiTM Melaka) — browser extension that reads a live Lazada cart page and verifies CPU/motherboard compatibility before purchase. FastAPI rules service in Docker on Render.com; compatibility data scraped and normalised from manufacturer specs. Published to the Microsoft Edge add-ons store.

JavaScript · Python · FastAPI · Docker · Data scraping · Regex

Awarded Best Industrial Panel Final Year Project (2024)

CLIENT / FREELANCE

MNS Tech Store

E-commerce platform for PC parts and accessories.

Laravel · Blade · MySQL · Tailwind CSS

Bakers Heist

E-commerce storefront for a cake shop and bakery.

HTML5 · CSS3 · JavaScript

bakers-heist.vercel.app
